

Alan Hamlett

Principal Software Engineer with a track record owning and scaling large-scale consumer products, mobile apps, and developer tooling used by millions.

LEADERSHIP & EXPERIENCE

WakaTime, San Francisco — *Founder/Principal engineer* (Mobile & Full-Stack)

2020 - 2026 (6 years)

Designed, built, and scaled a developer analytics platform used by 500k+ developers worldwide. Owned architecture and implementation across IDE plugins, desktop apps, browser extensions, backend services, and data pipelines enabling a unified developer productivity platform. Responsible for long-term technical direction, reliability, and product evolution.

Airbnb, San Francisco — *Senior software engineer* (Mobile & Full-Stack)

2017 - 2020 (3 years)

Worked on a core product team responsible for Pricing, Booking, and Cancellation experiences across iOS, Android, and Web. Served as technical owner across platforms, driving implementation in Swift (iOS), Kotlin/Java (Android), and TypeScript/React (Web). Shipped high-impact features supporting end-to-end user flows fully instrumented with A/B testing and metrics to measure performance, reliability, and business impact used by millions of travelers worldwide.

ZeroCater, San Francisco — *Senior software engineer* (Full-Stack)

2015 - 2017 (2 years)

Owned end-to-end development of features across ZeroCater's public website and internal tooling ecosystem. Developed backend and frontend systems in Python and TypeScript, for customer experiences and internal workflows used by operations teams. Operated as a full-stack generalist with broad ownership across product, platform, and internal systems in a high-growth startup environment.

More job history available on my LinkedIn including Prezi (2013 - 2014), WhiteHat Security (2011 - 2013), Texas Instruments (2010 - 2011), IC Enable (2007 - 2011)
